SUBARU GLOBAL PLATFORM

Foundation always matters. Our cutting-edge platform for the Forester increases torsional rigidity by 40%, reduces body vibration by 50% and also improves collision absorption.

BOXER ENGINE

Designed with a low centre of gravity to give you better control and response. Vibrations are also minimised for a more comfortable drive.

SYMMETRICAL ALL-WHEEL DRIVE

Power is permanently distributed to all four wheels for maximum traction and excellent handling, even in the harshest conditions.

LARGER* CONVENIENCE

Driver Monitoring System (DMS) now also lets you control your car's climate with hand gestures. DMS facial recognition provides a more personalised drive and also alerts you if you are distracted while driving.

LARGER* INTUITION

X-MODE, for difficult terrain, now switches to standby when the Forester exceeds 40km/h and reactivates automatically when the car slows to 35km/h or less.

LARGER* CONTROL

Subaru Global Platform, Boxer Engine and Symmetrical All-Wheel Drive are performance innovations. Together, these give the new Forester its solid foundation, unbeatable traction and optimum balance. Moreover, the newly improved suspension makes the ride even smoother, the handling even better and the quick-steering feel even more responsive.

LARGER* CONFIDENCE

Eye-catching new exterior with a dynamic redesign of the front grille, front fog lamps, headlights and 18-inch alloy wheels, giving you the inspiration you need for the adventure of your life.
